Declarations

Funding. No external funding was received for this study.

Competing interests. Ning Zhou is employed by Beijing Freedo Technology Co., Ltd., which develops geospatial-world-model software. The author declares no other competing financial or personal interests.

CRedit author statement. Ning Zhou: Conceptualization, methodology, software, data curation, formal analysis, visualization, writing—original draft, writing—review and editing.

Acknowledgements. The author thanks the anonymous reviewers for independent technical verification and constructive methodological comments.

Ethics statement. Not applicable; the study used geospatial raster, vector and derived public-data products and did not involve human or animal participants.

Declaration of generative AI and AI-assisted technologies in the writing process. During preparation of this work, the author used OpenAI Codex for language editing, code review and document-formatting assistance. The author reviewed and revised all outputs and takes full responsibility for the content of the publication.

Data and code. The ArcGIS-served public benchmark source release is archived at <https://doi.org/10.5281/zenodo.22689057> (v2.0.0; GitHub tag v2.0.0, commit 77e2c59; concept DOI <https://doi.org/10.5281/zenodo.22663475>). The Zenodo-generated ZIP preserves Git LFS pointer identities; hydrated large artifacts required for a full numerical rerun are retrieved from the tagged repository and verified against the included manifests.
